Layher® 

More Possibilities. The Scaffolding System.

SIMPLIFIED SCAFFOLDING BUSINESS ADMINISTRATION WITH LAYPLAN QUANTIFY

Quantify makes managing your scaffold business easy. From one user-friendly program, you can monitor inventory, ship materials, generate invoices, set reminders, manage re-rentals, and oversee all your jobs – with web-based tools making information and site operations available on-the-go.

Quantify offers several functionalities:

- ▶ Stock control of volume (scaffolding, and other materials) and serialised (tools, other equipment) assets. This includes primary depots, scattered holding/laydown areas across sites, and reporting on material as allocated to each scaffold.
- ▶ Equipment maintenance and recording of damaged, scrapped, and lost items.
- ▶ Individual scaffold scheduling, tracking, and reporting.
 - ▶ Identification of planned, estimated, approved, in-use, not-in-use, and dismantled scaffolds, including location and mapping.
 - ▶ Customisable details and reporting on each scaffold – measurements, associated workers, status, planned/actual build/dismantle dates, work orders.
 - ▶ Detailed inspection and activity tracking with associated materials, costs, and request turnaround times.
 - ▶ Performance dashboards graphing comparatives of materials handling (erection/modification/dismantle minutes per piece) against activity hours logged, planned versus actual costs, inspections history, and other important metrics.
 - ▶ Intelligent scaffold tagging via QR codes, allowing much easier identification of scaffolds during site walks and audits.
 - ▶ Activity reporting and schedules, including erections, modifications, inspections and dismantles.
 - ▶ Identification and tracking of individual scaffolding metrics to facilitate management of schedule driven contracts.
- ▶ With the optional Quantify Web add-on, web browser access to stock and shipping reports, scaffold tracking details and scaffold location maps.

SALES AND SERVICE BY:

Avontus Software Corporation | 31 High Street Back, Ely, Cambs CB7 4WH
